

Regarding RM-10413:

As an amateur radio operator Extra Class I am against the proposal to reallocate the present Novice bands, particularly as to how it would affect CW/digital operation on the already crowded frequencies below 7.100 Mhz, where international amateur and illegal phone operation already takes place now. I would suggest addressing this issue before considering any reallocation of the amateur bands.

Thank you very much,  
Mike Lyness, AF4LQ
